Welcome to the Clondrohid Online Heifer Sale...

The Clondrohid herd was founded in 1958 and operated as a flying herd from 1967 to 1987.

Dedicated breeding resumed in 1987, strengthened further by the introduction of leading American and Canadian cow families. Milk recording and classification were incorporated in the early 1990s, supporting steady genetic and performance gains.

In 2009 the herd was dispersed as the family pursued interests outside farming. Milking recommenced shortly afterwards with a high-EBI foundation group, which quickly produced notable AI bulls, including Clondrohid Black Lightning and others. In 2020 a strategic decision was made to reintroduce international cow families to Clondrohid. Purchases from top herds across Cork, Kerry, and Limerick have since contributed to a modern herd that combines strong genetics, high performance, and consistent functionality. The quality of this work was recognised in 2024 when the Clondrohid herd was named Overall Winner of the Spring A Section in the Cork Holstein Friesian Club Herds Competition.

☒ 2025 herd average projected:

– 9200 litres 4.0% F 3.4% Pr 701kgs milk solids

☒ Herd classification - 75 cows - Average Score 87.2

☒ All cows are VG or EX

☒ 16 EX cows to EX93

☒ 46 VG cows

☒ 10 VG 2 year old heifers

☒ 3 GP Heifers

We are confident that the heifers offered for sale will be valuable additions to any herd.
